Gamify

FOR SCHOOLS & LEARNING ORGANISATIONS

Playable learning.

Visible progress.

TURN CURRICULUM INTO MISSIONS

Gamify helps educators turn their own learning materials into playable challenges and review learning performance. Learners explore, learn and apply knowledge through curriculum-aligned missions

Explore

Explore interactive worlds, uncover possibilities and spark curiosity

Learn

Discover key concepts and build understanding through interaction

Apply

Put knowledge into action, make decisions and solve challenges

From Passive Learning to Active Understanding

Explore, discover and apply knowledge through interactive experiences, with instant feedback to guide improvement.

Beyond Learning by Doing

A Continuous Cycle of Exploration, Discovery and Growth.

Playing to learn transforms education from a passive chore into an active and immersive adventure. Gamify taps into “The Power of Play” to make studying deeply engaging and highly effective.

Why play in learning with Gamify?

01

Purposeful exploration

Instead of just watching or reading, you become the protagonist of an interactive quest or mission

02

Discover knowledge in play

Turns abstract rules and visual cues into intuitive “aha” moments that build durable mental models

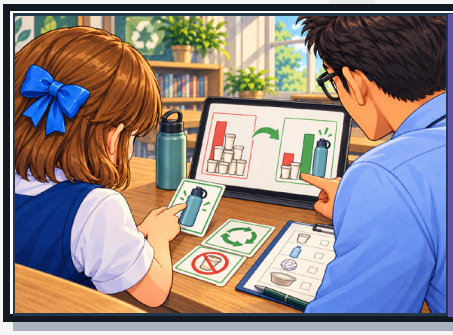

03

Applications in practice

Strategic decision-making and problem-solving encourages learners to apply knowledge in practical solutions

04

Feedback for continuous attempt

Reframes mistakes as helpful clues, correct answer as progress to encourage continuous but insightful learning

Different ways to play
More ways to show learning

Making Learning Visible Through Multiple Forms of Evidence.

Learning goes beyond getting the right answer.
Gamify uses different game modes to help students demonstrate their understanding, apply knowledge and develop skills through interactive experiences.

Conceptual understanding

Answer questions, identify key concepts and check understanding. Reveal learning gaps and areas requiring further support

Application

Apply knowledge to real-world situations, connect concepts and make informed choices. Demonstrate practical understanding

Decision-making

Make choices, respond to changing situations and consider consequences. Reveal decision-making patterns and approaches

Problem-solving

Test ideas, observe outcomes and refine solutions through feedback. Demonstrate problem-solving skills and adaptability

Beyond Right or Wrong Answers

Gain deeper insights into how learners think and solve problems — not just whether they get the answer right.

From teaching materials to playable learning

How Gamify transforms existing lesson content into interactive games.

Use the materials you already teach with. Gamify helps prepare learning objectives and creates interactive activities, while educators stay in control of the learning focus.

Just Give Us Your Materials

Upload your existing resources. Gamify reads and understands them

Review, Don't Start from Scratch

Gamify proposes learning objectives for teachers to review and align with their curriculum

Let Gamify Build the Game

AI generates playable learning experiences. No coding, no technical setup, and minimal preparation

You Teach. We Make It Playable.

Start with the materials you already have.
